

HVAC

High-Performing Mechanical Systems, Tailored to Your Needs

OUR ADVANTAGE

Nearly 70 years of experience

Broad market expertise across commercial and industrial facilities

Licensed, highly trained technicians

Proven expertise in complex mechanical systems

Value engineering for cost and performance optimization

Strong safety and code compliance focus

Energy-efficient, high-performance solutions

Single-source provider from design through service

24/7/365 emergency support

MSCA Green Star HVAC Service

As a single-source provider of high-quality HVAC solutions, EMCOR Services Fagan has the skills and capabilities to meet a full range of system and equipment requirements in accordance with ASHRAE, SMACNA, NFPA, and local code requirements, ensuring compliance, safety, and optimal performance. Whether you need complete system replacement, new construction, or emergency services, our expert technicians provide knowledgeable and reliable assistance 24 hours a day, seven days a week.

Expertise for Systems of Any Size

We install and service equipment of all sizes, types, and brands. Whether it's a small air-cooled system or a central energy plant with thousands of tons of cooling capacity, Fagan can help provide the best solution for your facility.

Our expertise covers:

- > Direct digital control (DDC) systems
- > Chillers and central plants
- > Cooling towers
- > Boilers
- > Central plants
- > Pumps
- > Refrigeration
- > Duct and piping insulation
- > Specialized data room equipment
- > Building automation and control systems
- > Variable refrigerant flow (VRF) systems
- > Specialized equipment for data centers and telecom
- > Process cooling systems
- > Industrial ventilation systems
- > Make-up air units (MUA)
- > Dust collection and exhaust systems
- > High-capacity air handling units (AHUs)
- > HEPA filtration systems
- > Cleanroom HVAC (ISO classifications)
- > Negative pressure environments
- > Infection control HVAC (healthcare)
- > Laboratory exhaust systems

End-to-End Solutions from Proven Pros

Our team includes highly experienced technicians, engineers, and project managers. We invest in sophisticated testing and diagnostic equipment for maintenance, and our construction team is engineering focused, seeking to continuously increase value and efficiency.

Count on us for complete services:

- > Design-build
- > Sheet metal fabrication and installation
- > Indoor air quality and filtration
- > Refrigerant management
- > Testing, calibration, and air balancing
- > Tennant fit outs, core and shell, and retrofits
- > Preventive maintenance, repairs, and emergency service
- > Thermal scanning and vibration analysis
- > Start-up and commissioning
- > Energy assessments
- > Asset management
- > Rigging
- > Fuel oil/containment
- > Energy-efficient system design
- > Retro-commissioning
- > Building decarbonization strategies
- > Electrification (heat pumps)
- > Heat recovery systems
- > Demand-controlled ventilation

WHAT CAN WE DO FOR YOU?
