

## Single-Source, Code-Compliant Solutions

You can depend on the licensed journeymen plumbers at EMCOR Services Fagan to deliver everything from new installations and retrofits to maintenance, troubleshooting, and 24/7 emergency service. Our single-source solutions cover design, maintenance, and installation in compliance with IPC, UPC, ASME, and NFPA standards, promoting safety, reliability, and full regulatory adherence.

### Efficiency and Quality on Every Job

No matter how complicated your plumbing need, we have the capabilities (and licenses) for the job. We follow all relevant plumbing codes, both local and federal, and our plumbers undergo rigorous training and testing.

On new construction and retrofits, our design-build approach—including preconstruction, engineering, estimating, and more—helps us meet rapid project schedules and strict budgets. For maintenance and service, we work diligently to minimize disruptions to your operations and limit downtime.

### WHAT CAN WE DO FOR YOU?

**EMCOR Services Fagan**  
3125 Brinkerhoff Road  
Kansas City, KS 66115

### Unmatched Equipment and System Expertise

- > Domestic water, storm, and sanitary pumping systems
- > Potable and non-potable water systems
- > Healthcare and medical gas
- > Grease traps
- > Sump pumps
- > Touchless, low-flow and high-efficiency fixtures
- > High-pressure piping systems
- > Chemical piping systems
- > Corrosion-resistant materials (CPVC, HDPE, stainless steel)
- > Clean-in-place (CIP) systems
- > Water treatment systems
- > Natural gas piping systems
- > Vacuum systems
- > Acid waste systems (labs, pharma)
- > Reverse osmosis (RO) systems
- > Deionized (DI) water systems
- > Greywater and rainwater reuse systems
- > Water conservation systems

### OUR ADVANTAGE

Nearly 70 years of experience

Broad market expertise across commercial and industrial facilities

Licensed, highly trained technicians

Value engineering for cost and performance optimization

Strong safety and code compliance focus

Single-source provider from design through service

24/7/365 emergency support

MSCA Green Star HVAC Service

### Complete Capabilities

- > Design-build
- > Repairs, renovations, and retrofits
- > Welding and fusion welding
- > Preventive maintenance
- > Excavation
- > Backflow testing
- > Camera inspections and hydro jetting
- > Plumbing system audits
- > Water quality testing
- > Leak detection & repair (advanced diagnostics)
- > Pipe condition assessment
- > Code compliance inspections
- > Emergency system containment and repair
